PERFORMANCE

High Energy Class Ratings: the De Dietrich cooling collection boasts products which are rated A+ for energy efficiency, which delivers an amazing 25% more efficiency than A class'. Given that the refrigerator is the second largest consumer of electricity in the home, these high performance ratings are an added benefit in the kitchen.

FEATURES:

- **Custom Built:** the De Dietrich Collection offers a suitable appliance to suit every kitchen. For an impressive centre-piece, choose from the stunning and contemporary American Side by Side design or if flexibility is required, a choice of integrated appliances with a reversible door opening system is also available. With combis and single door appliances, each model fits effortlessly to individual requirements and, if space is at a premium, the undercounter fridge and freezer provide an ideal solution.
- **Refrigeration Control:** for storing delicate foodstuffs such as meat and fish, many models have a specifically designated space identified by an arrow where the temperature should not exceed 4°C. A safety indicator in the shape of a green disc plus a thermostat provides a visible warning should the temperature in this area have risen.
- **Anti-bacterial Lining:** to prevent bacteria from breeding, all De Dietrich refrigerators feature a special anti-bacterial lining manufactured into the fridge itself. The result is that on contact with the fridge, bacteria are immediately destroyed through a simple organic reaction, thus ensuring that food is always preserved in a perfectly healthy environment.
- **Electrovalve Technology:** the Electrovalve offers the advantage of the fridge and freezer temperature to be controlled separately to the nearest degree. An electronic temperature monitor permits temperature regulation to each area independently so the larder section can be switched off yet the freezer section remains fully functional which is ideal as a holiday setting.

...OFFER THE UPMOST IN PERFORMANCE

ELECTRONIC TEMPERATURE CONTROL

Boosts the coldness – keeping food extra fresh

FAN

Guarantees optimum conservation

MODULAR DOOR SHELVING

For added convenience

- **FAN Refrigeration:** the FAN fridge freezer ventilation system uses pulsed air constantly diffused within the cavity. Therefore the same temperature is maintained throughout, guaranteeing optimal preservation of foodstuff irrespective of which shelf is used.
- **Frost-free:** most De Dietrich cooling products have the added benefit of being frost-free, eliminating the need for defrosting. The even distribution of cold air prevents frost from forming inside the appliance and on foodstuffs so it is also easier to read labels.
- **Freezing Capacity:** the selection of De Dietrich freezers provide excellent freezing capacities to suit all storage requirements including an impressive 20kg / 24 hours in our full size integrated single door freezer.
- **Rising Time:** with rising times of up to 24 hours, De Dietrich cooling appliances install confidence in food preservation even in the event of a power cut.
- **Interior Equipment:** De Dietrich excellence and attention to detail continues inside our refrigerators as standard:
 - **Reversible Doors:** added flexibility.
 - **Integrated Evaporator:** optimises the internal volume and is easy to clean.
 - **Glass Shelves:** added hygiene.
 - **Transparent Vegetable Compartments:** easy to view contents.
 - **Flexible Door Storage:** keep small bottles and condiments tidy.

Our largest single door fridge even has a large double vegetable compartment that rolls out on rails so easier accessibility even when full.

COOLING 250 LITRE INTEGRATED FRIDGE FREEZER

AMERICAN - WHEN BIG IS BEAUTIFUL...

CHILLED WATER & ICE DISPENSER

DELICATESSEN DRAWER

With the choice of 3 temperatures, it's ideal for delicate foodstuffs

170L FREEZER CAPACITY

Including ice-cream shelf

WHEN STORAGE SPACE IS PARAMOUNT AND STYLE IS KEY

De Dietrich showcases an outstanding and newly improved American style fridge freezer, catering to those for whom internal storage space is essential. The black high gloss door fronts exude style and class and provides a contemporary, professional edge to any kitchen.

Offering a carefully designed internal space arrangement, this model benefits from an LCD display depicting function and electronic temperature regulation.

DELICATESSEN DRAWER

This special compartment boasts an independent temperature control offering three possible temperatures, which is ideal for delicate and temperature-sensitive foodstuffs such as meat and fish.

VEGETABLE COMPARTMENT

The humidity controlled vegetable compartment guarantees to keep vegetables fresh and tastier for longer, whilst also preserving crispness and their goodness.

WATER FILTER & ICE DISPENSER

For clear, crisp and chilled water directly from the mains, the new built-in water filter feature is a fantastic addition to an already superb appliance...in fact water never tasted so good. Plus, ice cubes and crushed ice are available on demand from the ice dispenser – ideal for when the weather is warm, for cocktails or making smoothies.

THE BIG FREEZE

The American 4* freezer benefits from an increased freezer space and capacity and also includes a purpose-built ice cream shelf.
